FAA Specifications for Asthma

Please provide a current status report (clinical summary) regarding the history of asthma for your patient. This report should include the following, along with any separate additional testing:

- frequency of emergency room visits or hospitalizations
- current medications, dosages, and side-effects, if any
- pulmonary function tests, if deemed necessary

Please note if:

- symptoms worsen
- increased frequency of ER or outpatient visits, or hospitalizations
- if three or more medications are required for stabilization
- use of steroids in dosages equivalent to more than 20 mg prednisone per day

Please do not hesitate to contact our office if you have any questions regarding this request.

Thank you.
