FAA Specifications for Hepatitis C

Please provide a current status report (clinical summary) regarding the history of Hepatitis C for your patient. This report should include the following, along with any separate additional testing:

- any symptoms that have developed
- name and dosage of medication(s) used for treatment and/or prevention with comment regarding side effects, if any
- current liver function profile performed within 90 days

Please note if:

- new symptoms have developed
- there has been a change in treatment regimen or alpha-interferon has been initiated
- any side effects from required medication
- any adverse change in liver function studies

Please do not hesitate to contact our office if you have any questions regarding this request.

Thank you.
