**FAA Specifications for Renal Cancer**

Please provide a current status report (clinical summary) regarding the history of bladder cancer for your patient. This report should include the following, along with any separate additional testing:

- a clinical evaluation performed within the past 90 days that confirms the condition is stable on current regimen and no changes recommended
- no evidence of metastatic disease, extracapsular extension, or paraneoplastic syndrome
- treatment is completed and the patient is back to full, unrestricted activities (ECOG performance status is 0)

Please note if:

- new recurrences occur
- new treatment is initiated

Please do not hesitate to contact our office if you have any questions regarding this request.

Thank you.
